PROFESSIONAL PROFILE

Results-driven Full Stack Developer and IT Technician with over 2 years of professional experience in designing, developing, and maintaining critical web applications and IT infrastructure. Based at CGEM Casablanca, delivered measurable outcomes including a 40% reduction in workflow processing times and IT ticket resolution times. Currently pursuing a Professional Master's in Artificial Intelligence & IoT at ENSAM Casablanca. Specialized in the Laravel ecosystem, RESTful API design, system administration, and digital transformation of business processes. Trilingual: Arabic, French, and English.

PROFESSIONAL EXPERIENCE

Full Stack Developer & IT Support Technician

Nov 2024 – Present

CGEM – Confédération Générale des Entreprises du Maroc • Casablanca, Morocco

- Developed and maintained critical internal applications using Laravel, MySQL, Tailwind CSS, JavaScript, and AJAX, directly contributing to business process digitalization.
- Collaborated with business managers and end users to map, optimize, and automate workflows, reducing manual processing and strengthening data security.
- Provided Tier 1 & Tier 2 technical support: diagnosis and resolution of hardware, software, and network incidents to minimize service disruptions.
- Managed user access controls and permissions (RBAC), conducted system analysis, and ensured availability and integrity of infrastructure.
- Continuously improved user interfaces, backend scalability, and database performance in production environments.

Full Stack Developer Intern

Mar 2024 – Aug 2024

CGEM – Confédération Générale des Entreprises du Maroc • Casablanca, Morocco

- Designed and developed from scratch a web-based purchasing and inventory management system, automating validation workflows and enabling real-time inventory tracking.
- Implemented a Role-Based Access Control (RBAC) system and automated notifications, reducing response times by 40%.
- Delivered a responsive interface (Tailwind CSS, JavaScript) backed by a robust Laravel/MySQL REST API.

KEY PROJECTS

IT Support System (Ticket Management)

- Full incident management platform with automated notifications, priority management, and real-time dashboards — 40% reduction in resolution time.
- Stack: Laravel, MySQL, JavaScript, AJAX, Bootstrap.

Regional Online Voting Platform

- Secure and transparent digital voting system with real-time result tracking and full audit logging for administrative review.
- Implemented integrity checks and role-based permissions to guarantee election security.

Mandates & Representation Management Platform (Taklif)

- Application managing mandates and representation requests with role management, automated PDF document generation, and Excel export for administrative traceability.

Purchasing & Supplies Management Application

- Modernized a legacy inventory, ordering, and validation management system — interface redesign and workflow automation significantly improved processing speed and data reliability.

EDUCATION

Professional Master's – Artificial Intelligence & IoT (In Progress)

Sep 2025 – Present

ENSAM – École Nationale Supérieure des Arts et Métiers • Casablanca, Morocco

- Modules: AI Fundamentals, IoT Architecture, Big Data, Cloud Computing, Deep Learning.

Bachelor's Degree – Software Application Engineering (IDAI)

Sep 2023 – Jul 2024

Faculty of Sciences and Technology • Tanger, Morocco

- Software development, database management, algorithmic analysis. Final project: student management system.

DEUST – Applied Mathematics & Programming (GEGM)

Sep 2019 – Aug 2022

Faculty of Sciences and Technology • Tanger, Morocco
