EXPERIENCES:

CGEM (CONFÉDÉRATION GÉNÉRALE DES ENTREPRISES DU MAROC)

Position: Full Stack Development Intern and Technical Support
Location: Casablanca
Period: March 19, 2024 - August 30, 2024
Technologies used: Laravel, HTML, CSS, Tailwind, JavaScript, MySQL

- System development: Designed and developed a request management system, allowing users to submit, validate, and track the status of their requests.
- Role implementation: Developed distinct user roles (user, validator, administrator) with specific privileges.
- Notification automation: Implemented email notifications for key actions, such as request validation or rejection.
- Technologies: Backend development with Laravel, frontend using HTML and CSS, ensuring a responsive and efficient application.
- Database management: Created and migrated tables using MySQL to ensure proper application functionality.
- Testing and deployment: Performed application tests in a development environment to ensure stability and reliability before production release.
- Maintenance: Participated in the corrective and adaptive maintenance of existing applications.
- Technical support: Provided assistance for project-related presentations involving ministers.
- Problem-solving: Identified and resolved various server-related issues.
- Technical consulting: Offered technical advice on projects and presentations.
- Collaboration: Worked closely with development teams to meet deadlines and adhere to technical specifications.

PERSONAL AND ACADEMIC PROJECTS

- Personal Website Development
- Developed and deployed several personal websites for various uses.
- University Project using Excel VBA
- Completed a complex university project with Excel VBA, demonstrating advanced skills in automation and programming with VBA.
- Online Exam and E-commerce Website Development
- Designed and implemented online exam platforms and e-commerce websites.
- Card Game Development in C++ with Qt Library
- Created a card game using C++ and Qt, showcasing strong object-oriented programming skills.
- University Website Design and Implementation
- Utilized Laravel, HTML, CSS, JavaScript, PHP, and SQL to design and develop a university website, demonstrating versatility in web development and strong database skills.
